

AWS Summer Builder Cohort — Build. Deploy. Demo.

By AWS Student Builder Group IGDTUW

About the Program

The AWS Summer Builder Cohort is a 6–8 week hands-on program where students pick a domain, build a real project, deploy it to the cloud, and present it at Demo Day.

This isn't a workshop series — every participant ships something live by the end.

Domain Tracks

Choose one track at the time of registration:

- **Full Stack + Cloud** — portfolios, dashboards, student web apps (Next.js, Firebase, AWS Amplify)
- **AI + Cloud** — chatbots, PDF summarizers, recommendation engines (OpenAI, LangChain, Bedrock)
- **DevOps + Cloud** — CI/CD pipelines, Dockerized apps, scalable deployments (EC2, GitHub Actions)
- **Cybersecurity** — phishing detectors, threat analysis tools, OSINT platforms (Python, AWS IAM)

Program Schedule

Week	Focus
Week 0	Orientation, team formation, GitHub & Discord setup
Week 1	Git, cloud basics, deploy a static site
Week 2	Track workshops, finalize idea & architecture
Week 3	Build and deploy your MVP
Week 4	AWS deployment — EC2, S3, Lambda, CloudFront

Week 5	Polish, UI/UX, presentation prep
Week 6	Demo Day — live showcase, judging, awards

Rules & Guidelines

1. Teams must have 2–4 members with mixed skill levels encouraged.
2. Each team must choose one domain track and stick to it.
3. Attendance at a minimum of 4 sessions is required to qualify for Demo Day.
4. Weekly progress updates must be posted on Discord every Friday.
5. Final submission (GitHub repo, deck, demo video, live link) is due 48 hours before Demo Day.
6. All projects must be deployed publicly — no local-only demos accepted.
7. AWS/cloud services must be meaningfully used in the final project.
8. Plagiarism or copied projects result in immediate disqualification.
9. Be respectful — this is a learning community first, competition second.

Judging Criteria

Leaderboard system.

Throughout the cohort, participants will earn **Builder Points** by actively engaging in the program through activities such as attending sessions, sharing progress updates, participating in Build Nights, completing challenges, contributing to projects, and helping the community.

Top performers on the leaderboard will receive **AWS goodies and exclusive rewards**.

What You Take Home

Every participant who completes the cohort gets a Completion Certificate. Every session attendee gets a certificate of participation by AWS. Top teams win awards, LinkedIn features, and a research paper pathway. All participants build a deployed project, active GitHub history, and real cloud experience.
